BACK TO THE FUTURE IV

Protective environment and educational opportunities for vulnerable boys and girls in Lebanon.

The “Back to the Future” project aims to ensure that vulnerable girls and boys in marginalized communities in Lebanon have access to inclusive quality education. The project ensures the provision of non-formal education programs targeting out-of-school refugee children at risk of dropping-out from formal education. Moreover, the project provides a protective environment and supports the wellbeing of children and their families to support their engagement in educational activities.

The phase four (IV) of the project was implemented by AVSI and Terre des Hommes Italy in Lebanon, funded by the European Union Humanitarian Aid.

The “Back to the Future” project has been running since 2016.
